- Readily teaches others, cross-training where applicable.
- Understands business needs, management structures and the need for accurate reporting
- Specializing in Microsoft: SharePoint, SQL, Exchange, Active Directory, Windows
- Design, implement, and train on SharePoint solutions with workflow, WebParts, etc.
- Design, install, support & repair Microsoft, Novell, & Linux OS's
- Proficient in ASP, SQL, VBscript, Javascript, & PowerShell scripting
- Evaluate, package, deploy, and maintain applications in enterprise-class networks
- Leverage available low and no-cost tools to automate and monitor systems
- Advanced design, implementation and troubleshooting in messaging (Exchange, SMTP/IMAP/POP3, Groupwise)
- Perform Security Audits, Policy and Patch Management strategy
- Design and implement Internet Services (web, mail, dns, rsync, etc)

RECENT PROFESSIONAL EXPERIENCE

- Fall/Winter 2010 – Design Analyst for University of Colorado; Designed solution to move 100K mail accounts from in-house to Live@edu.
- Fall 2010 – SharePoint architecture, design and testing for Denver Water Intranet
- Feb 2010 – Consultant for District Attorney's Office of Colorado for Exchange migration and various system administration challenges
- Continued project based work with System Source and The Packet Exchange involving SharePoint 2010 sales calls, business processes discovery, migrations and customizations, Exchange troubleshooting and more...

SENIOR SYSTEMS ENGINEER

System Source, 338 Clubhouse Road, Hunt Valley, MD 21031 (www.syssrc.com)

1985-present

CONSULTANT ROLE

- Uncover business value using Microsoft SharePoint; build, design and support MOSS and SharePoint 2010 farms. Perform SharePoint migrations, business analysis, process automation and Information Architecture.
- Novell (eDirectory, Identity Manager, Open Enterprise Netware and Suse Linux)
- Security Audits, Penetration Testing and Policy Compliance
- Maintain 75%+ billable time and high customer satisfaction scores
- Ensure accurate and timely communications with clients and managers

TRAINER ROLE

- Microsoft Certified Trainer for Windows (NT thru Server 2008), SQL administration and programming (SQL 7 thru 2005), Exchange (5.5 thru 2007), SharePoint (WSS 2 thru SharePoint Server 2010)
- Security+ and SCNP Instructor (see <http://certification.comptia.org/security> and www.securitycertified.net)
- Teach custom curriculum, designed specifically for the client
- Maintain top box student satisfaction scores
- Taught in-house, on-site or remote

PRESENTER ROLE

- Regular technical presenter at corporate seminars, usually SharePoint related
- Present in person or via videoconferencing

WEBMASTER, TECHNICAL SUPPORT, SECURITY SPECIALIST, PROGRAMMER

The Packet Exchange, Sole Proprietor (www.packetex.com)

1982-present

WEB DESIGN AND HOSTING

- Evaluate, install, maintain and troubleshoot Web Services for multiple clients on multiple physical and virtual servers (Windows and Linux)
- Maintain DNS, Web, Mail, FTP, SharePoint WSS, rsync, and other services
- Assist customers with troubleshooting, setup and connectivity issues
- Web Site design and maintenance

SMB BUSINESS SUPPORT

- Support small business networks and single PC maintenance
- Typical SHO support – virus protection, security, firewalls, remote access, etc.

EDUCATION/CERTIFICATIONS

- Graduated in the top 5% of high school class (Milford Mill High School) in 1981
- Microsoft Certified Technology Specialist (MCTS) in SharePoint & Exchange
- Microsoft Certified Trainer (MCT) for Hyper-V, Vista, Server 08, SharePoint (both WSS3 and MOSS 2007), Exchange 2007, SQL 2000+
- Security Certified Network Professional (SCNP)
- HP Master Accredited Systems Engineer (MASE- Messaging & Collaboration)
- Novell Workgroup Technical Specialist + Groupwise
